## **DETAILED ACTION**

### **Remarks**

This reply reflects the Board of Patent Appeals and Interferences decision and the Examiner's updated search. Claims 1-20, 22-42, and 44-46 are presented for examination.

### ***Allowable Subject Matter***

1. Claims 1-20, 22-42, and 44-46 are allowed over the prior art.

### **Reasons for Allowance**

2. The following is an examiner's statement of reasons for allowance:

Claims 1-20, 22-42, and 44-46 are rejected over the prior art for reasons indicated by the Board of Patent Appeals and Interferences decision on 5/23/05. The Examiner's updated search reveals US reference number 6023714 to Hill et al. that teaches a method that dynamically adapt the layout of a document to a particular output display device by assigning values to formatted properties of the display device using HTML tags associated with formatted information. The markup language defines the properties of the formatted document that is appropriate for displaying the document on a particular resolution display. See col. 7, lines 17-60. However, Hill, neither singularly nor in combination with the Reinhart and the Helman references, fails to teach the modification of tags and/or parameters associated with the tags of formatted information defined by markup language to achieve power savings (i.e., to reduce the number and intensity of bright pixels) in a display of the formatted information on the display device.

Art Unit: 2676

For the aforementioned reason, the limitations of claims 1-20, 22-42, and 44-46 are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
